Heredia, Costa Rica

PROFESSIONAL SUMMARY

Software Engineer specialized in full-stack development with hands-on experience in RPA automation and web application development. Proficient in C/C++, C#, JavaScript, Python and Agile methodologies. Focused on efficient solutions, RESTful APIs and scalable systems development with modern technologies like Node.js and React.

EDUCATION

Universidad Cenfotec   San José, Costa Rica
Bachelor's Degree in Software Engineering (In Progress)   *2023 – Present*

WORK EXPERIENCE

Technical Internship   2023 – 2024
Greenlight Consulting   *San José, Costa Rica*
- Developed and implemented process automation using RPA, reducing manual processing time
- Executed QA testing, technical documentation and automated bot deployment
- Collaborated on client projects generating 20+ weekly hours of operational savings

Vendor Support Specialist   2022
Amazon   *San José, Costa Rica*
- Provided technical support to 40+ vendors daily on Amazon Marketplace platform
- Resolved complex issues with catalog, inventory, listings and policy compliance
- Managed escalation cases and troubleshooting of API integrations with vendor systems
- Maintained 95%+ satisfaction rate through effective technical communication in English and Spanish

Banking Agent   2022
Sykes Enterprises   *San José, Costa Rica*
- Managed bank accounts, identity verification and processing of 30+ daily transactions
- Implemented security procedures and regulatory compliance in financial operations

FEATURED PROJECTS

Simulated Trading System | *.NET MVC, Bootstrap, JWT, SQL Server, Chart.js*   2024
- Developed full-stack application for stock trading simulation with MVC architecture
- Implemented secure authentication using JWT and role-based authorization
- Designed interactive dashboard with real-time data visualization using Chart.js and SweetAlert2
- Optimized SQL Server queries for efficient handling of transactions and multiple user portfolios

Management RESTful API | *.NET Core, Entity Framework, JWT, SQL Server*   2024
- Built complete RESTful API with CRUD operations and layered architecture
- Implemented Entity Framework with Code First for database modeling and migrations
- Developed JWT authentication system with refresh tokens and session management
- Applied best practices: data validation, error handling and Swagger documentation

TECHNICAL SKILLS

Languages: C, C++, C#, JavaScript, HTML5, CSS3, Java, Python
Backend/APIs: .NET Core, Entity Framework, Node.js, Express.js, RESTful APIs, JWT, Swagger
Frontend: React.js, ASP.NET MVC, Bootstrap, Chart.js, Responsive Design
Databases: SQL Server, PostgreSQL, MongoDB, Entity Framework Code First
DevOps/Tools: Git, GitHub, Visual Studio, Visual Studio Code, Postman, Version Control
Methodologies: Agile, Scrum, Test-Driven Development (TDD), Code Review
Other: Data Structures, Algorithms, RPA, JSON, Performance Optimization

LANGUAGES

Spanish: Native
English: C2 Proficiency
